PROFESSIONAL SUMMARY

Business Analyst with 2 years of experience spanning analytics engineering, business intelligence, and data-driven decision-making. I build automated end-to-end data pipelines that turn messy datasets into clean, reliable reporting that supports strategic goals. Strong expertise in the modern data stack, SQL, Python, and BI tooling, with a proven ability to bridge the gap between raw data and actionable business insights.

EDUCATION

University of Wisconsin - Madison Madison, WI
Bachelor of Science in Information Science, Class of 2025
Certificate in Data Science
Relevant Coursework: Data Programming, Data Science Modeling, Statistical Data Visualization, Database Design, Calculus, Microeconomics

WORK EXPERIENCE

APTIM Government Solutions, LLC Madison, WI
Business Analyst (Full-Time) July 2025 – Present

- Own end-to-end data pipelines, from ingestion and data modeling to transformation, testing and production deployment, including scheduled automated workflows
- Build and maintain Looker Studio and Power BI dashboards used by marketing team to monitor website traffic and user behavior
- Surfaced behavioral patterns from ActiveCampaign API data that informed campaign optimizations, contributing to a 15% increase in user conversion rates
- Manage GA4 configurations and implement custom tracking solutions across GTM containers to enhance data accuracy and delivery

Business Analyst (Internship & Part-Time) May 2024 – May 2025

- Transformed 1M+ rows of residential home assessment data into clean, interactive Power BI dashboards, enabling program managers to track assessment outcomes and identify data quality issues
- Analyzed energy program data across 5+ utility programs by combining disparate data sources in SQL, surfacing trends that informed program strategy and reporting decisions
- Built and deployed web applications using Python and Streamlit, including a GA4 analytics dashboard connected to live API data

Israel Defense Force Tel Aviv, Israel
Supply Chain Manager August 2018 – April 2021

- Optimized $150K monthly food procurement through tracking systems and supplier data, reducing costs by 20%

PROJECTS

Thinkific Data Pipeline Automation | Airbyte, Google Cloud Platform, Docker, Kubernetes, Google BigQuery, dbt, Looker Studio

- Designed and deployed a self-hosted Airbyte pipeline on Google Cloud Platform using Docker and Kubernetes to automate data ingestion from Thinkific into Google BigQuery, powering stakeholder-facing dashboards in Looker Studio.
- Reduced third-party data integration costs by an estimated 60% by self-hosting Airbyte on GCP while maintaining scalable, configurable pipeline infrastructure.

Website Chatbot Analytics | Zendesk API, Python, Pandas, Google BigQuery, Google Cloud Platform, Jupyter Notebook

- Built a custom ELT pipeline using the Zendesk Tickets and Ticket Audits APIs to extract chatbot conversation history, transform nested event data into structured analytics-ready tables, and load it into BigQuery.
- Increased customer satisfaction by 10% through a Looker dashboard surfacing chatbot pain points and FAQ trends

E-Commerce Analytics | Python, Snowflake, dbt, SQL, GitHub Actions

- Built an end-to-end analytics pipeline using Python, Snowflake, and dbt to transform e-commerce transaction data into dimensional models and executive dashboards in Tableau.

LEADERSHIP AND ATHLETIC EXPERIENCE

University of Wisconsin - Madison Men's Soccer August 2021 – May 2022

- Practiced and competed daily as an NCAA Division 1 athlete, balancing rigorous athletic demands with academic responsibilities

Israel National U14 - U19 Soccer Team July 2014 – May 2019

- Represented my country in high-pressure soccer competitions, demonstrating leadership and motivating teammates

TECHNICAL SKILLS

- Languages: Fluent in Hebrew and English
- Technologies & Skills: Python, SQL, HTML/CSS, dbt Core, GitHub Actions, Docker, REST APIs, BigQuery, Snowflake, MySQL, Git, GCP, Looker Studio, Power BI, Tableau, Streamlit, GA4, Excel
