Madison, WI | (608) 417-0502 | adirraph@gmail.com | LinkedIn | Portfolio | GitHub

PROFESSIONAL SUMMARY

Business Analyst with experience across analytics engineering, data infrastructure, and business intelligence. I own the full data lifecycle, from ETL/ELT design and modeling to testing and production-ready reporting. I build scalable analytics systems using the entire stack, including SQL, Python, dbt, cloud platforms, and BI tools, transforming raw data into insights that support stakeholder decision-making.

EDUCATION

University of Wisconsin - Madison

Madison, WI

Bachelor of Science in Information Science | Certificate in Data Science, Class of 2025

WORK EXPERIENCE

APTIM Government Solutions, LLC

Madison, WI

Business Analyst (Full-Time)

July 2025 – Present

- Own end-to-end data pipelines, from ingestion and data modeling to transformation, testing and production deployment, including scheduled automated workflows.
- Leverage Claude Code daily to accelerate data engineering tasks across dbt modeling, Python scripting and pipeline debugging.
- Build and maintain Power BI, Looker Studio and Tableau dashboards used to monitor website traffic and user behavior.
- Analyzed and surfaced behavioral patterns from ActiveCampaign API data to inform campaign optimization strategies, contributing to a 15% increase in user conversion rates.
- Manage GA4 configurations and implement custom solutions across GTM containers to enhance data accuracy and delivery.

Business Analyst (Internship & Part-Time)

May 2024 – June 2025

- Transformed 1M+ rows of residential home assessment data into clean, interactive Power BI dashboards using power query and DAX measures, enabling program managers to track assessment outcomes and identify data quality gaps.
- Analyzed energy program data across 5+ utility programs by combining disparate data sources in SQL, surfacing trends that informed program strategy and reporting decisions.
- Built and deployed web applications using Python and Streamlit, including a GA4 analytics dashboard connected to live API data.

Israel Defense Force

Tel Aviv, Israel

Supply Chain Manager

August 2018 – April 2021

- Optimized \$150K monthly food procurement through tracking systems and supplier data, reducing costs by 20%.

PROJECTS

Thinkific Data Pipeline Automation | Airbyte, Google Cloud Platform, Docker, Google BigQuery, dbt, Looker Studio

- Designed and deployed a self-hosted Airbyte pipeline on GCP using Docker to automate data ingestion from Thinkific into BigQuery, reducing third-party integration costs by 60% while powering stakeholder-facing Looker Studio dashboard.

Sprout Social Analytics Pipeline | Sprout Social API, Python, SQL, Google BigQuery, dbt, GitHub Actions, Power BI

- Built an automated end-to-end ELT pipeline using the Sprout Social API to ingest 11 tables across 3 brands into BigQuery, transforming them into 5 dbt mart models with pre-calculated metrics and delivering self-serve Power BI dashboard.

Website Chatbot Analytics | Zendesk API, Python, Pandas, Google BigQuery, Google Cloud Platform, dbt, Power BI

- Built a custom ETL pipeline using the Zendesk Tickets and Ticket Audits APIs to extract AI chatbot conversation history, transform nested event data into structured analytics-ready tables using dbt, and load it into BigQuery.
- Increased customer satisfaction by 10% through a Looker dashboard surfacing chatbot pain points and FAQ trends.

Fraud Detection & Validation API | Python, SQL, FastAPI, SQLAlchemy, MySQL, AWS RDS

- Developed a fraud detection pipeline querying 180K+ records from an AWS RDS database and deployed a REST API with 3 real-time validation endpoints to intercept fraudulent program orders, reducing fraud-related program expenses by 10%.

LEADERSHIP AND ATHLETIC EXPERIENCE

University of Wisconsin - Madison Men's Soccer

August 2021 – May 2022

- Practiced and competed daily as an NCAA Division 1 athlete, balancing rigorous athletic demands with academic responsibilities.

Israel National Soccer Team U14 - U19

July 2014 – May 2019

- Represented my country in high-pressure soccer competitions, demonstrating leadership and motivating teammates.

TECHNICAL SKILLS

- Languages: Fluent in English and Hebrew.
- Technologies & Skills: Python, SQL, HTML/CSS, dbt Core, GitHub Actions, Docker, REST APIs, BigQuery, Snowflake, MySQL, Git, Claude Code, GCP, AWS, Looker Studio, Power BI, Tableau, Streamlit, GA4, Excel.
